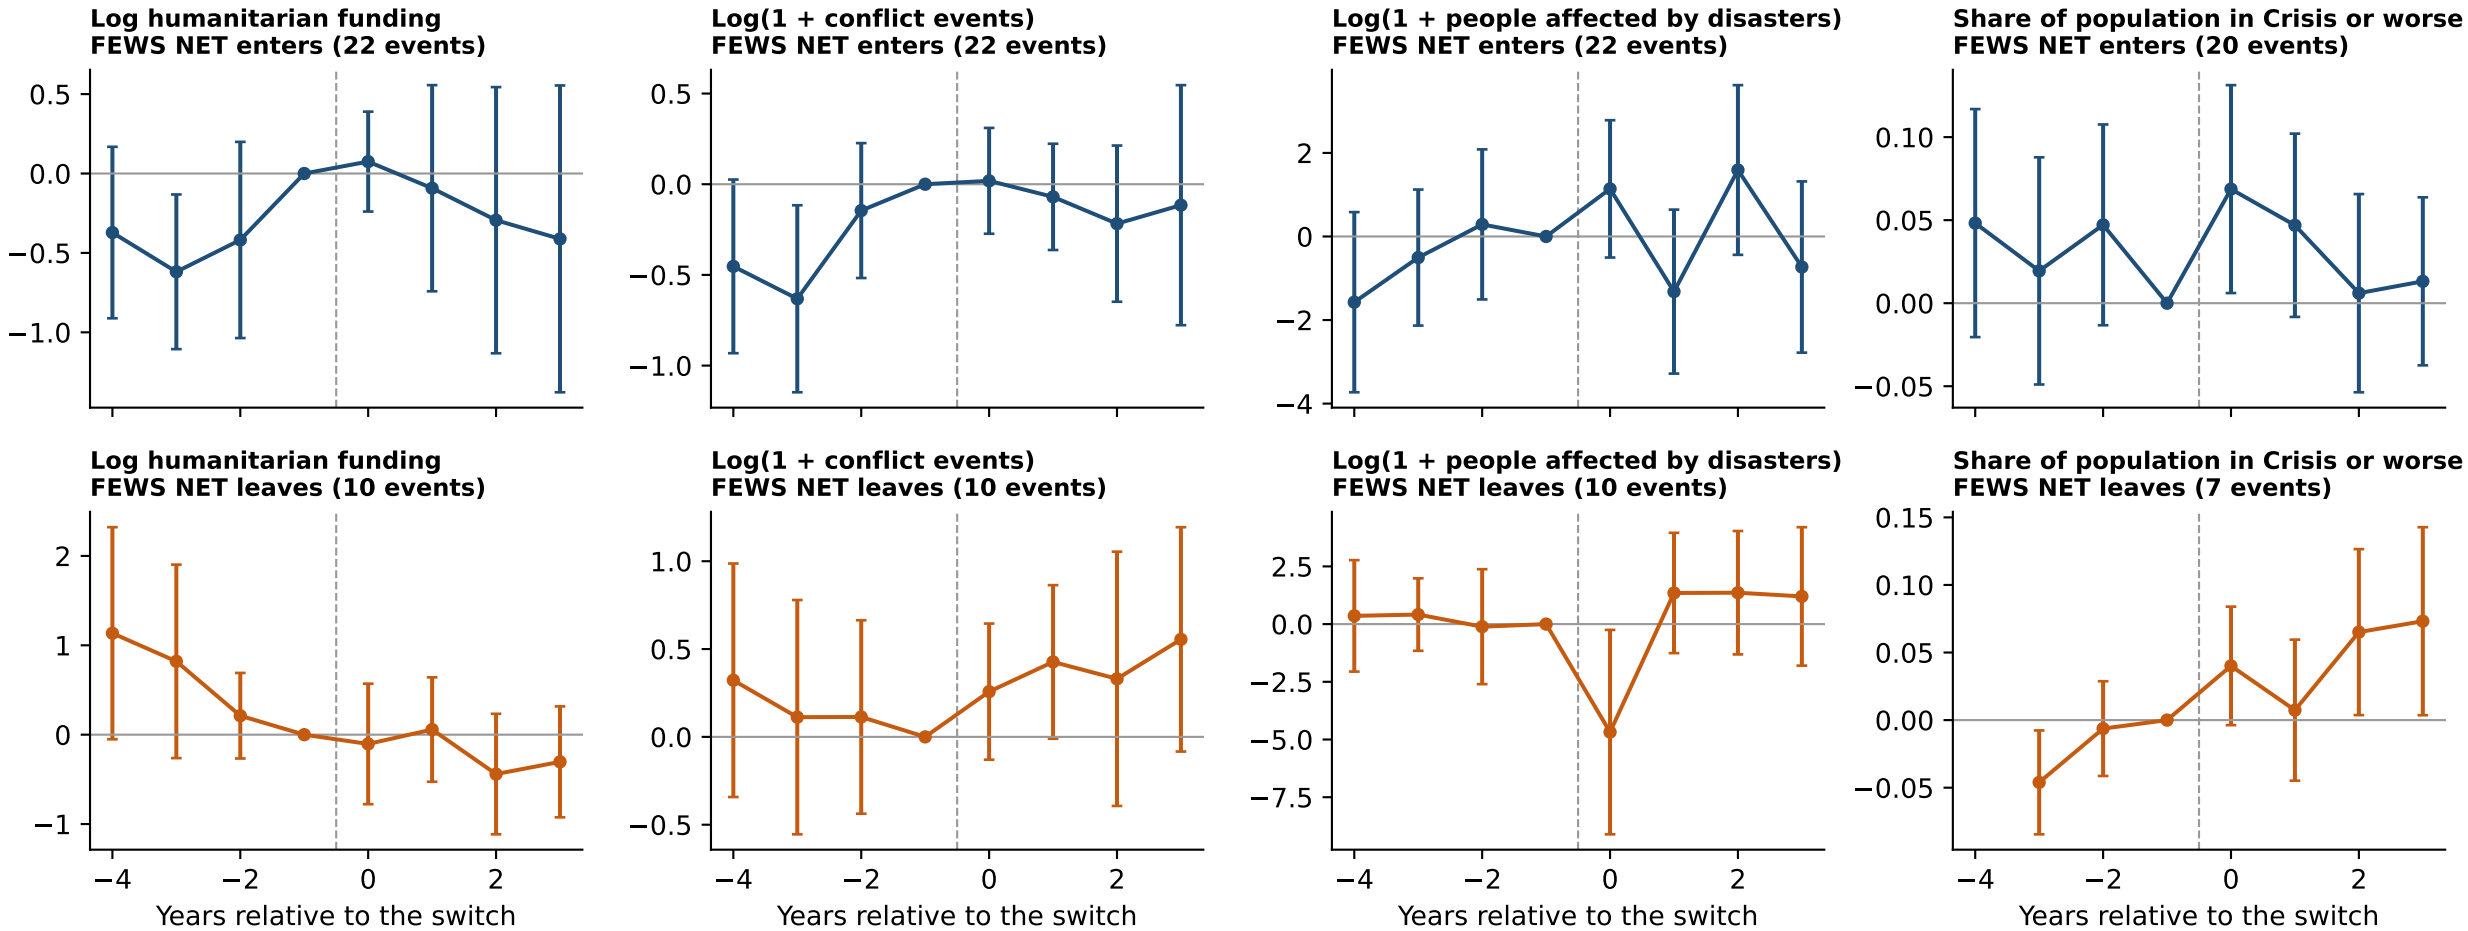
Did anything else change when FEWS NET entered or left a country?



Stacked difference-in-differences around each real FEWS NET coverage switch, 2010-2024 (entries, top; exits, bottom), relative to countries whose coverage never changed. Year before the switch = 0.
Bars: 95% intervals, clustered by country. Outcomes come from sources independent of FEWS NET: UN Financial Tracking Service, ACLED, EM-DAT, Global Report on Food Crises (2016 on).
