

Lines: share of all areas. Each faint dot: all the areas in one country whose Emergency began in the same month (dot size = number of areas; dots are spread sideways slightly so they do not overlap). 1,753 areas in which an Emergency began, in 103 country-months, 2011-2026. Comparison: a random 30,000 area-months that were below Emergency and stayed below. Source: FEWS NET classifications and forecasts (IPC scale).
