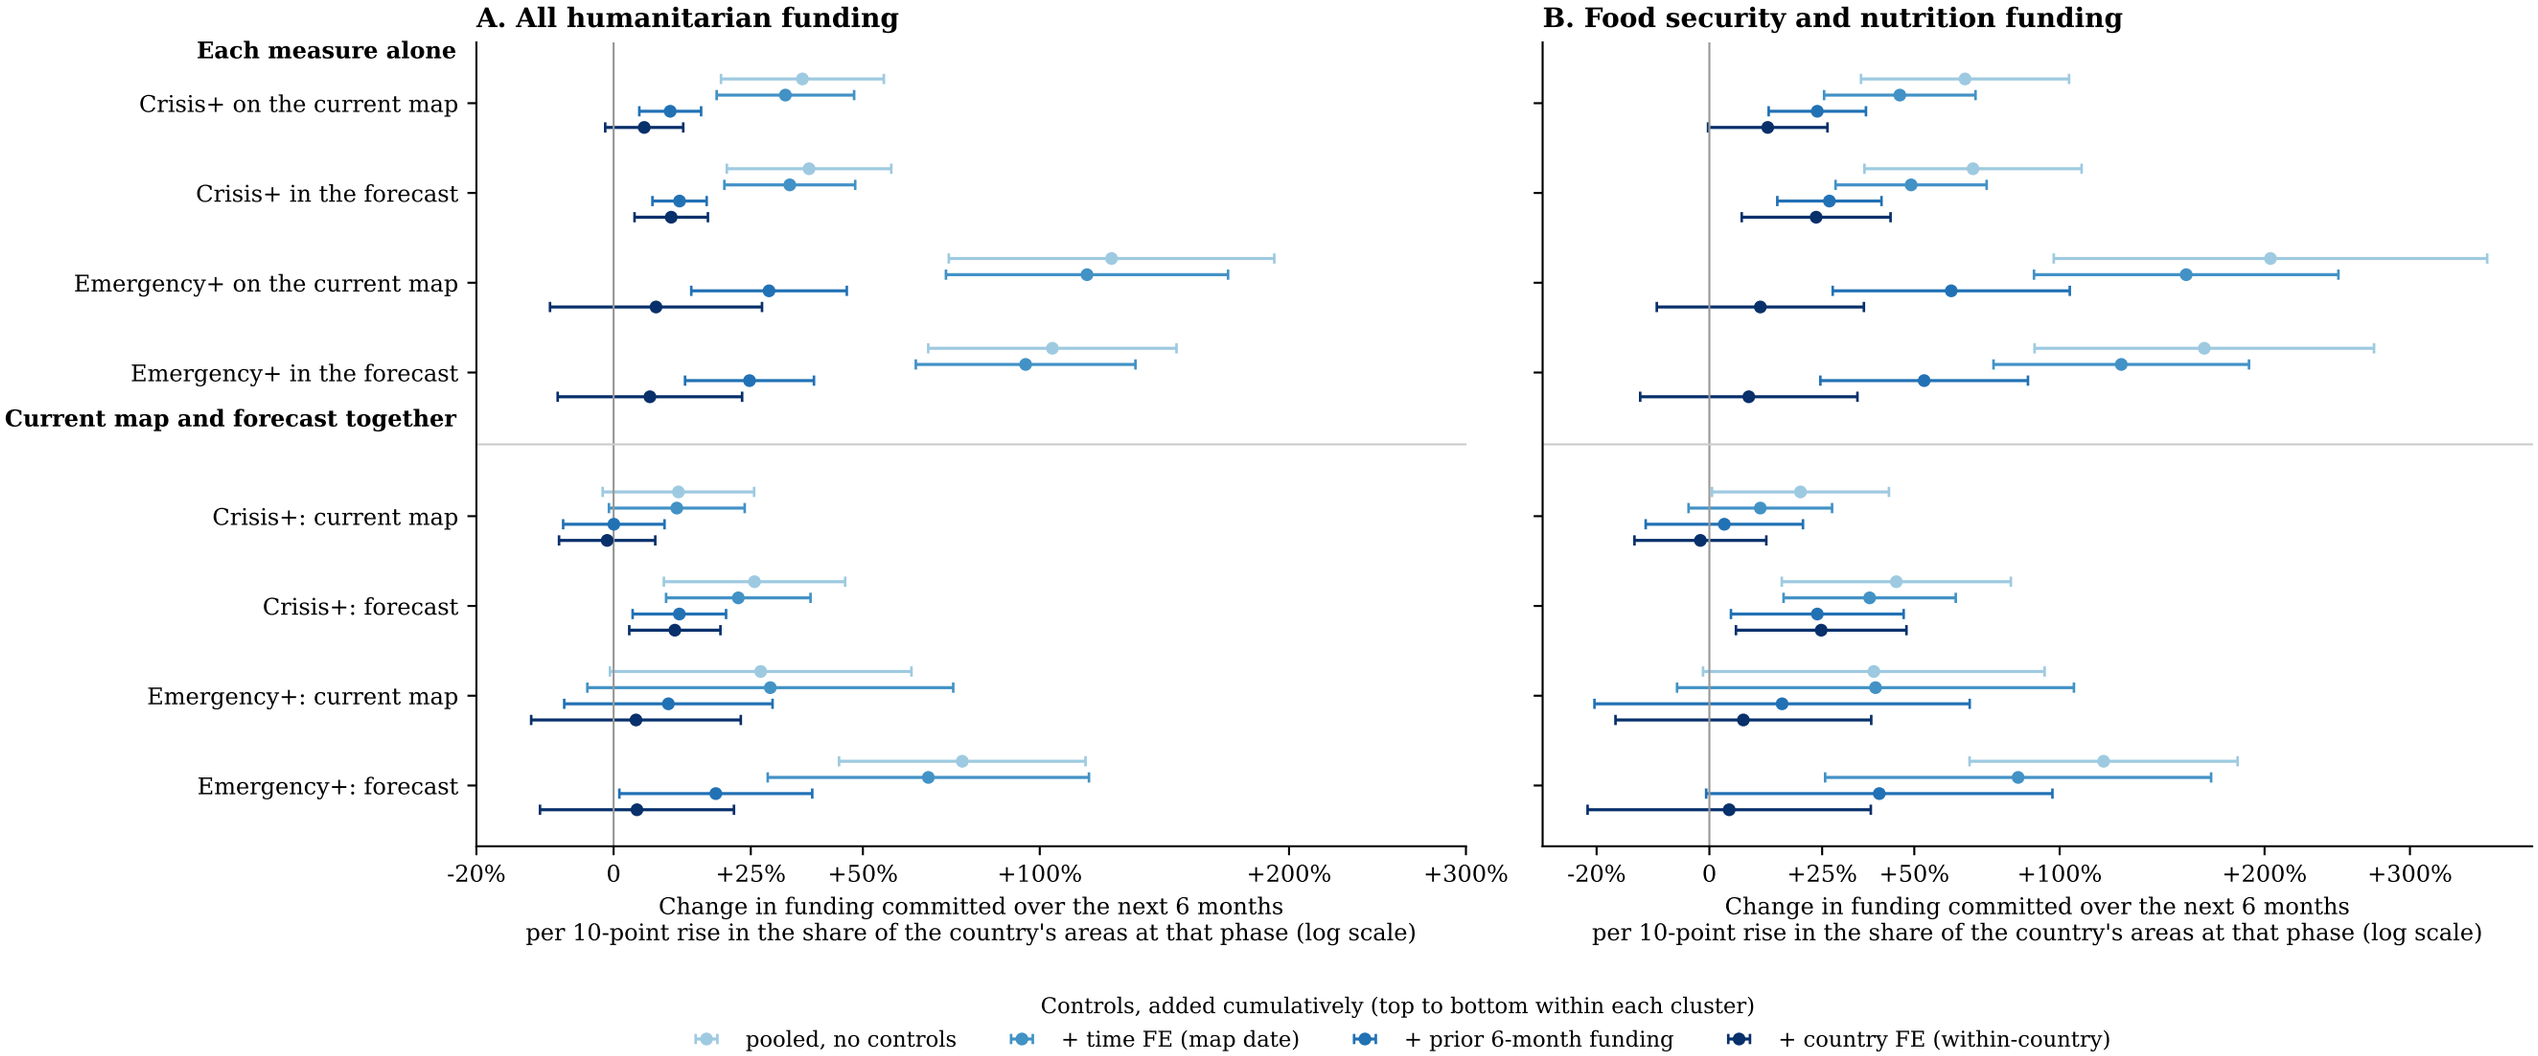
Humanitarian funding follows FEWS NET's maps across countries, and its forecasts within them



Country x FEWS NET map round panel, 37 countries, 2011-2024. Funding: humanitarian commitments in OCHA's Financial Tracking Service in the 6 months after the map (log). Shares: unweighted share of the country's FEWS NET areas at the phase on the current-situation map, or in the medium-term (4-8 month) forecast issued with it. Controls added top to bottom in each cluster: none; time fixed effects, one per map date shared by all countries (global funding swings); funding in the 6 months before the map; country fixed effects (each country's usual aid level). 95% intervals clustered by country.
