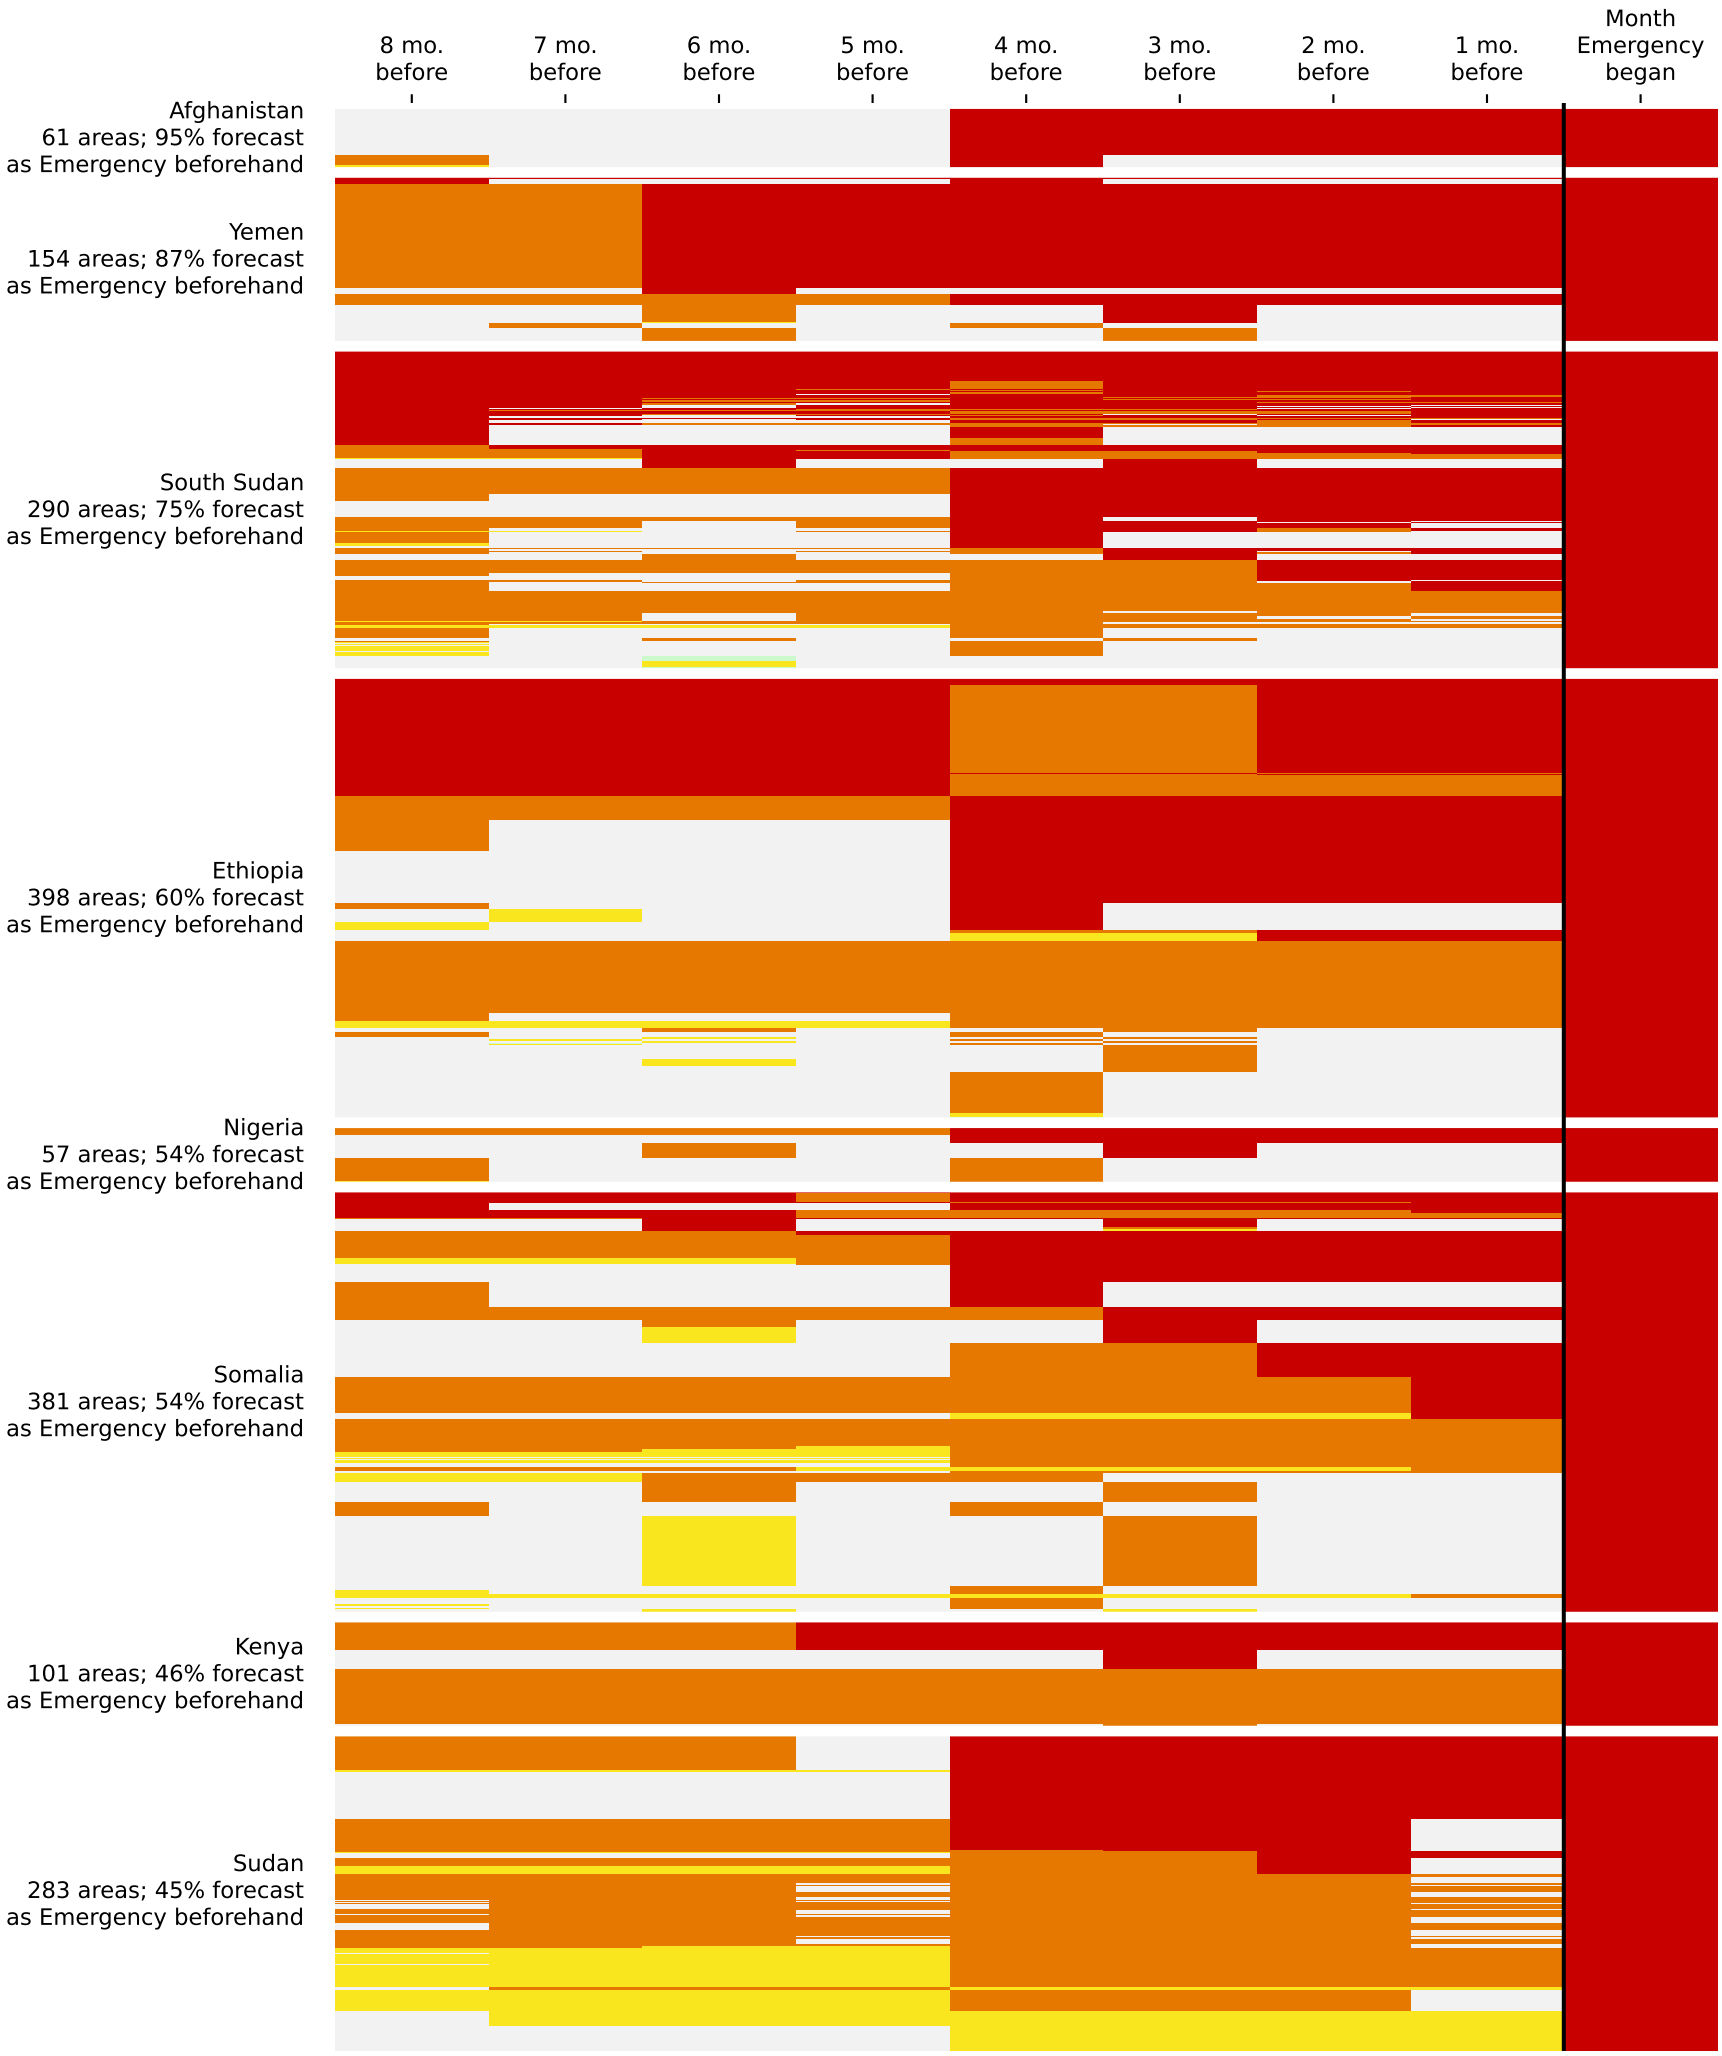
Every Emergency that began, and what FEWS NET had forecast for it



Each row is one map area in which an Emergency (Phase 4+) began, 2011-2026; countries with at least 20 such areas. Within each country, rows are sorted by how early Emergency was first forecast. Grey cells: that month's report made no forecast covering the period (forecast periods follow FEWS NET's seasonal calendar). Source: FEWS NET classifications and forecasts (IPC scale).
